KEYWORDS: *Brihatrayi kala, Laghutrayi, Kustha (Saussurea lappa (C.B. Clarke))*

ABSTRACT

Brihatrayi (Greater triad) and *Laghutrayi* (Lesser triad) are excellent, highly esteemed and extensively used sources of Ayurvedic knowledge. *Brihatrayi* comprises *Charaka samhita*, *Sushruta samhita* and *Astanga Hridaya* and *Laghutrayi* comprises *Madhava nidana*, *Sharangdhar samhita* and *Bhava prakasha*. *Ayurveda* delineates the uses of *Kustha* (*Saussurea lappa* (C.B. Clarke)) for the management of different diseased conditions. Most of the *Samhita Grantha* have mentioned it in the treatment of *Kustha*, *Shvitra* (skin disease), *Vata vyadhi* (epilepsy), *Arsha* (piles), *Mutrakricha* (difficulty in micturition), *Jvara* (fever) and *Vrana prasadana* (wound healing). This article reviews the various references of *Kustha* in *Brihatrayi* and *Laghutrayi*, regarding its different formulations and its prime therapeutic indications.

INTRODUCTION

Drug consists of the dried root *Saussurea costus* (Falc.) Lipsch. (syn. *Saussurea lappa* (Decne.) C.B. Clarke) family Asteraceae. The plant is a perennial herb about 1-2 meters in height, distributed in Himalayas, Kashmir eastward at an altitude between 2500-3000 meters and also cultivated in Himachal Pradesh, Uttarakhand and Sikkim.^[1] *Saussurea lappa* (C.B. Clark) is a tall, robust perennial herb. Its stem erect, 1.2m-2m high. It has simple, alternate, opposite or whorled leaves. Leaves are membranous, irregularly toothed; basal one very large, 0.6-1.2m long, triangular, with a long lobately winged stalk. Stem leaves are smaller. Flowers heads, stalk less, hard, rounded, 2.5-3.8 cm. dia, 2-5 forming axillary and terminal clusters. Bracts surrounding the heads many, ovate-lanceolate, long, pointed, rigid, bent back, hairless. Corolla 2 cm. long, tubular, dark blue-purple or almost black. Stamens free. Anther tails fringed. Achene- 3mm. long curved and compressed. Pappus hairs 1.7cm long, brown, all feathery. Fruit achene, up to 8mm long, compressed, curved, tip narrowed, with 1 rib on each face, top contracted, cupped. Root is stout, up to 60cm

long brownish with longitudinal streaks and furrows with reticulate surface, having characteristic odor.^[2]

It act as *Shukrala*, *Vataraktahara*, *Vishapahara*, *Kashaghna*, *Kusthaghna*, *Vataghna*, *Raktashodhaka*, *Varnya*, *Deepana*, *Pacchana*, *Vajikara*, *Rasayana* and *Twakadoshhara*.^[3]

Material and Methods

1. *Kustha (Saussurea lappa (C.B. Clarke) in Brihatrayi*

a) *Charaka Samhita*: - (1000 B.C.-4th A.D.)^[4]

It is first of three most important treatise of *Ayurveda*, which are jointly known as *Brihatrayi*. In "Charaka Samhita" *Kustha* has been described in *Shukra shodhana Mahakashaya*, *Lekhaniya Mahakashaya*, *Asthapanopaga Gana*, *Katuka Skandha*. It is also described under the name of *Pakala* and *Vapya* in some preparation. This is used as an ingredient of many preparations for external and internal medication is cited below:

b) Sushruta Samhita: - (1000 B.C.-2th A.D.)^[5]

Sushruta Samhita authorised by *Vriddha Sushruta* is the next most important treatise of *Ayurveda*, *Sushruta* was basically a surgeon, yet he has discussed aetiology, diagnosis and treatment of diseases in a very scientific way in his treatise. He also recognized *Kustha* as an important drug for clinical practice and while classifying the drug on the basis of their pharmacological actions he placed this drug in *Eladi Gana*. As an ingredient of specific formulation or as a member of various groups of drugs in *Sushruta Samhita* are cited below:

(c) Ashtanga Hridaya: - (7th A.D.)^[6]

This is third most important treatise among *Brihatrayi*, written by Acharya *Vagbhata*. Subjects are very precisely collected and described in this book. *Vagabhata* followed *Charaka* and *Shusruta* regarding importance and use of *Kustha*. References of *Kustha* traced in this treatise are mentioned below:-

Kustha (Saussurea lappa (C.B. Clarke) in Laghuttryayi**a) Madhava Nidana (7th A.D.)^[7]**

It is first of three most important treatise of Ayurveda, which are jointly known as *Laghuttryayi*. In *Madhava Nidana* *Kustha* has not been described.

b) Sharangdhara Samhita: (13th A.D.)^[8]

It is second of three most important treatise of Ayurveda, which are jointly known as *Laghuttryayi*. In this *Samhita* *Kustha* has been described in many diseases as an ingredient of different preparation. The detail descriptions are cited below:

S. No.	Name of preparation/ Gana / Group of Drugs	Indication	Reference
1.	Brahmyadi Swarasa	Unmada Chikitsa	Sa.S.M.1/18
2.	Kwatha Kalpana	Sutikajwara, Kasa, Shwasa, murchha	Sa.S.M.2/47
3.	Brihata Manjisthadi kwatha	Shweta Kustha	Sa.S.M.2/137-142
4.	Narayana churna	Udara roga	Sa.S.M.6/81-89
5.	Kamdeva ghritama	Rakta-pitta Chikitsa	Sa.S.M.9/27-37
6.	Kalyanak ghrita pana	Apasmara Chikitsa	Sa.S.M.9/38-43
7.	Kasisdwaya ghritama	Kustha, Dadru, Pama	Sa.S.M.9/51-57
8.	Phala ghritama	Bandhya dosha	Sa.S.M.9/79-86
9.	Angara Taila	Sarvajwara Nashaka	Sa.S.M.9/99-100
10.	Narayana Taila	Vata roga	Sa.S.M.9/101-110

DISCUSSION

Saussurea lappa C.B. Clarke. is the original source of *Kustha*. It is well known drug since from *Vedic* period (*Atharvaveda*) to latest modern literature available about plants, but now a day the drug has come under endangered species. In classics, *Kustha* has been mentioned in those medications useful in skin disorder as a *Lepa/Pralepa*. The Asteraceae family comprises approximately 1000 genera and 30,000 species, distributed throughout the globe, of which, approximately 177 genera and 1052 species are found in India (Rao et al., 1988). The genus *Saussurea* of the same family comprises about 300 species in the world of which about 61 species found in India (Hajra et al., 1995). *Saussurea lappa* is one of the best-known species within this genus (Jain, 1991). *Saussurea lappa* root and its oil has become an important drug in the international market (Bremer, 1994).

CONCLUSION

The present review on *Kustha* of both *Brihattryi* and *Laghutrayi* can be useful to know about different formulations of *Kustha*. By this way we can use *Kustha* in the treatment of different diseases. Most of the *Samhita Grantha* have mentioned it in the treatment of *Kustha*, *Shvitra* (skin disease), *Vata vyadhi* (epilepsy), *Arsha* (piles), *Mutrakricha* (difficulty in micturition), *Jvara* (fever) and *Vrana prasadana* (wound healing). It use as *Rasayana* also. In this regard, further studies need to

carry out to explore *Kustha* for its therapeutics potential in preventing and treating diseases.
