ABSTRACT

Sweda Karma is included under *Purvakarma* of *Panchakarma*. *Swedana* helps to remove stiffness, heaviness, coldness of the body and makes the body to perspire. It also helps to convert the *Doshas* in a form so that, they can be removed from the body through *Vamana* and *Virechana*. Ayurvedic classics have described a wide range of *Swedas* which are classified into different categories depending upon various factors. One of those classifications made based on *Guna* of the *Sweda Dravya* which plays an important role in pacifying the *Dosas*. *Guna* means quality or property which has inseparable relationship with the *Dravya*. *Gunas* are 41 and classified into 4 types. They are *Artha Gunas* - 5; *Gurvadi Gunas* - 20; *Atma Gunas* - 6; *Paradi Gunas* - 10. But for treatment purpose, *Gurvadi Gunas* are widely used. Among *Gurvadi Gunas* like *Guru, Laghu, Sita, Ushna, Snigdha, Ruksha, Slakshna, Khara* etc., *Snigdha - Ruksha* properties have a very important role in *Swedana*. Charaka also classified *Sweda* based on *Snigdha - Ruksha* properties. The goal of the study is to collect various references of the drugs mentioned for *Sweda* and categorize them based on their *Snigdha* and *Ruksha* property so as to use them appropriately for therapeutic purposes.

INTRODUCTION

The '*Swedana*' *Shabda* is derived by adding the *Prathyayas* '*Nich'* and '*Iyut*' with the term *Sweda*. The literary meaning of this term is to make the body sweat. Charaka defined *Sweda Karma* as the therapy which relieves stiffness, heaviness and coldness of the body and make the body to perspire [1]. It can be achieved by many methods. *Sweda karma* is classified in to two types based on involvement of fire, *Saagni* and *Niragni sweda*. *Saagni sweda* is again classified into various types which includes *Ruksha sweda* and *Snigdha sweda*.

In the management of certain diseases like *Amavata* and *Manyastambha*, *Ruksha sweda* has been indicated. However, the method adopted for *Ruksha Sweda* is usually in the form of *Valuka Sweda*, which is making a *Pottali* made of sand or salt. But on many occasions patients have some difficulty in applying

Valuka Sweda on daily basis. Also limiting *Ruksha Sweda* only for *Valuka Sweda* seems to be inappropriate as very clearly it has been mentioned in *Charaka Sutra Sthana Swedadhyaya* that *Ruksha Sweda* can be performed by the use of certain *Ruksha Dravyas* mentioned for fomentation. Hence, primary goal of this study has been to identify and categorise *Ruksha* and *Snigdha Dravyas* helpful for *Swedana* purpose. The clinical application of the study is to utilize the said drugs in the form of both *Nadi sweda* or *Pottali sweda*.

Depending on the *Gunas* of the *Dravya* utilized for the *Sweda Karma* is of three types *Snigdha - Ruksha Sweda, Snigdha Sweda and Ruksha Sweda* which are adopted mainly for *Vata-Kapha, Vata* and *Kapha* respectively. So we can categorize *Sweda* based on the qualities of *Dravyas* used [2].

AIM OF THE STUDY

Aim of the study has been to identify, categorize and to enhance the scope and utility of *Snigdha* and *Ruksha Sweda* in clinical settings.

Sweda Mentioned Based on the Sthana of the Dosa

If *Vata* is accumulated in the *Amashaya* then first measure is to perform *Ruksha Sweda* which is followed by *Snigdha Sweda*. If *Kapha* is accumulated in

the *Pakwashaya*, first *Snigdha Sweda* is applied followed by *Ruksha Sweda* [3].

Properties or Qualities of *Swedana Dravyas*

Ushna, Tikshna, Sara, Snigdha, Ruksha, Sukshma, Drava, Sthira and *Guru* [4].

Among the various properties listed above, we will discuss about *Snigdha* and *Ruksha gunas* or qualities.

Importance of *Snigdha* and *Ruksha Gunas* in *Sweda Karma*

According to *Samanya – Vishesha Siddhanta*, *Snigdha Guna* alleviates *Ruksha Guna* of *Vata* and aggravates *Kapha*. *Ruksha Guna* alleviates *Snigdha Guna* of *Kapha* and aggravates *Vata*.

Snigdha quality is the special quality of *Jaliya Mahabhuta* [5]. Therefore *Snigdha* quality is defined in

Table 1 : Showing Clinical Conditions where *Snigdha* and *Ruksha Sweda* are Indicated

S.No	<i>Snigdha sweda</i>	<i>Ruksha sweda</i>
1.	<i>Pakshagata</i>	<i>Amavata</i> [7]
2.	<i>Viswachi</i>	<i>Manyastamba</i> [8]
3.	<i>Kati sula</i>	<i>Urustamba</i> [9]
4	<i>Janu sandhi gata vata</i>	<i>Amasaya gata vata</i> [10]
5	<i>Khalli vata</i>	<i>Trika sula</i> [11]

Sweda Mentioned According to *Dosas* [12]

1. *Vata Dosa Prakopa – Snigdha Sweda*
2. *Kapha Dosa Prakopa – Ruksha Sweda*
3. *Vata - Kapha Dosa Prakopa – Snigdha –Ruksha Sweda*

Table 2: Showing Probable Classification of *Sweda* according to *Guna* of *Dravyas* Used

S.No	<i>Snigdha – Ruksha Sweda</i>	<i>Snigdha Sweda</i>	<i>Ruksha Sweda</i>
1.	<i>Patra Pottali Sweda</i>	<i>Sastika Sali Pinda Sweda</i>	<i>Valuka Sweda</i>
2.	<i>Jambeera Pinda Sweda</i>	<i>Kukkutanda Pinda Sweda</i>	<i>Istika Pinda Sweda</i>
3.	<i>Churna Pinda Sweda with Snigdha and Ruksha Dravyas</i>	<i>Ksheera Dhuma</i>	<i>Churna Pinda Sweda with Ruksha Dravyas</i>

Other than this classification, there are some more drugs specially mentioned for the *Sweda*. We can classify them on the basis of *Guna* and can use according to the *Dosa Prakopa* in the patient.

Attempt has been made to identify *Snigdha* and *Ruksha Dravyas* and their frequency of usage from various types of *Sweda Dravyas* as per *Samhitas* are mentioned in the following table.

MATERIALS AND METHODS

Table 3: Showing *Snigdha* and *Ruksha Dravyas* Used for *Sweda Karma* Mentioned in *Samhitas* and Also Their Frequency (number of times each drug is repeatedly mentioned in all available references)

S.No	<i>Snigdha Dravyas</i>	frequency of drug	S.No	<i>Ruksha Dravyas</i>	Frequency of drug

terms of the capacity to induce wetness in the tissues and body. Most of the musculoskeletal and neuromuscular diseases are caused due to vitiated *Vata* are effectively treated by administration of *Snigdha Dravyas* which are used both internally and externally. *Snigdha* nurtures the tissues, decreasing the inherent dryness, wear and tear of the tissues and makes the cells strong and immune.

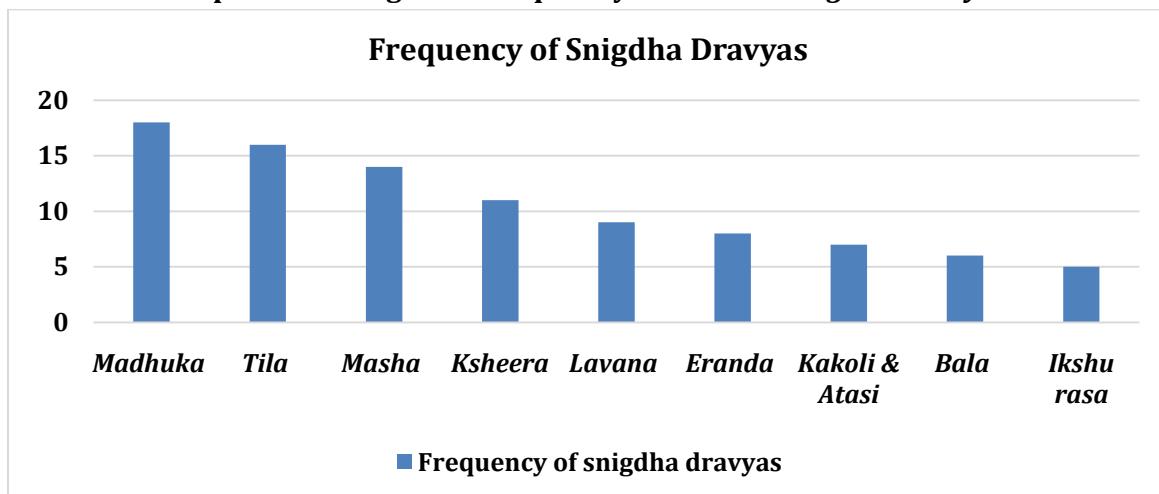

Dryness is the special quality of *Vayu* and *Agneya Mahabhuta* [6]. *Ruksha Guna* or quality is defined as the capacity to cause dryness. *Rukshatwa* reduces fat accumulation and treats various pathological manifestations caused by increased *Kapha* and *Snigdha*.

RESULTS AND DISCUSSION

Graph 1: Showing Most Frequently Mentioned Snigdha Dravyas

Graph 2: Showing Most Frequently Mentioned Ruksha Dravyas

CONCLUSION

Sweda Karma is important therapy which is performed before *Sodhana Karma*. But *Sweda Karma* itself may produce complete relief to a patient suffering from some of musculoskeletal and rheumatological disorders. Before *Sneha* and *Sweda*, it is always prudent to make *Ama-Nirama* assessment. For the reason that certain diseases like *Amavata*, *Manyastambha* etc., may require *Ruksha Sweda* and most of the *Vata Vyadhis* may need *Snigdha Sweda*.

Therefore in the present conceptual study of identification of *Snigdha* and *Ruksha Sweda Dravyas* has been made from all available sources of literature related to *Sweda Karma*.

This may help to utilize more frequently mentioned drugs for the purpose of obtaining a better therapeutic result.

❖ More frequently used *Snigdha Dravyas* are *Madhuka*, *Tila*, *Masha*, *Ksheera*, *Lavana*, *Eranda*, *Atasi*, *Kakoli*, *Bala* and *Ikshu Rasa*.

- ❖ Most frequently used *Ruksha Dravyas* are *Kusta*, *Yava*, *Mutra*, *Kshara*, *Sura*, *Devadaru*, *Sukta*, *Kuluttha*, *Dasamoola*, *Palasa* and *Mudga parni*.

This study may also help to increase the utility of *Sweda Dravyas* based on their *Snigdha* and *Ruksha* property.
